

M. Edward L. Coyle's Testimony, NASA (USA)

*« Having tried many other neutralizing agents
I have found Trivorex[®] superior in performance.*

*It took me some time but I have used up all the product which was given
as a trial sample. I love the Trivorex[®] product
and use it exclusively now for any corrosive type spill.*

*Some examples of our use of your product: 25 gallon (96 l) battery acid spill
on pavement, 40 gallon (150l) Sodium Hydroxide spill inside a tractor trailer,
as well as many small lab type spills of various corrosive materials.*

I will need 12 buckets.”
